Side view

Olympian^{TMD} – for sunny views.

Small, elegant and extremely good value: our new Olympian^{TMD} cassette awning is presented in this way. The closed construction of a cassette awning offers brilliant protection against environmental influences. The

clear design impresses with a simple elegance. The distinctive cassette construction and the attractive arm design of the awning is registered as an international design. The most up-to-date awning technology

and uncompromising quality guarantee the standard that you are entitled to expect from a top-quality product. Enjoy the most beautiful aspects of Summer - beneath an Olympian^{TMD} awning from VOSS.

Folding arm Secuflex™ 50

The folding arms of the Secuflex™ Generation are the heart of every Olympian™ awning. These arms are equipped with a plastic covered steel cable, which

Folding arm Secuflex™ 50

quarantee extremely long-lasting durability, as standard. Up to two springs in the arms ensure the highest elasticity in the folding arms. The central joint is almost closed, when completely extended.
